Mrs. Prof. Nila Djuwita F. Moeloek, MD. Ph.D., Special Envoy on MDGs for the President

Mr. Ir. Sarwono Kusumaatmaja, Chair of PA CSR Indonesia

Distinguished Participants,

Ladies and Gentlemen,

Family is the smallest unit of a nation. In the family, interaction and communication between father, mother and children who became an important think to process of education.

Behavior of clean and healthy living early in the family can create a healthy family. Furthermore, healthy family will form a healthy society to makes a healthy nation.

With a healthy nation, will increase the productivity of the nation. Therefore, a healthy family is a nation's investment for development of productive human resources.

Distinguished participants,

Ladies and gentlemen,

Indonesia is a big country with a rich of kind of flora and fauna that are very beneficial to the welfare of people. This should be very useful for people welfare. The problem of malnutrition is still common in society. Efforts to overcome malnutrition has been done, we can find the decline in malnutrition prevalence from 9.7% in 2005 to 4.9% in 2010. But we still have perform real actions to achieve reduction in 2015 to 3.6%.

The problem essentially contained in the following 6 factors, namely:

1. Low nutrient Knowledge of mothers
2. Low family income
3. Low Household food stocks
4. Not healthy Parenting behavior is
5. Consumption of foods not follow the rules of nutrition and health
6. The health condition of mother or child.

Distinguished participants,

Ladies and gentlemen,

Health problems must be supported by all parties, both government and civil society organizations, NGOs and business world.

For it is desirable for all components can play an active role in overcoming various health problems through community empowerment efforts that enhance the clean and healthy behaviors within the family.

Therefore, increased efforts to partnerships and participation in health development should be encouraged, enhanced, and developed.

That is why this Workshop can contribute to improve real concern in dealing with cases of malnutrition as part of efforts to achieve a quality Indonesian generation.

Thank you so much,

Wassalamu'alaikum warahmatullahi wabarakatuh
